

Industry conference to focus on leadership and nuclear human performance

Join us for the International Conference on Quality, Leadership and Management in the Nuclear Industry, July 16-19. There is still time to register!

Bruce Power hosts the 15th International Conference on Quality, Leadership and Management in the Nuclear Industry in Ottawa, July 16 - 19. The conference is organized annually by the European Atomic Forum (FORATOM) in cooperation with the International Atomic Energy Agency (IAEA).

The series of workshops will bring together nuclear professionals from around the world to exchange experiences, practical examples, new insights, and case studies related to leadership and management systems with topics ranging from counterfeit and fraudulent parts prevention to nuclear supply chain and talent development.

More information about the conference is available [here](#), and the full program can be downloaded [here](#).

Register at the Foratom.org website or [click here for direct access](#).

QLM Conference offers insight into leadership and management systems

Structured into a series of plenary, breakout and learning sessions, the July 16-19 QLM conference will cover a wide range of quality, leadership, safety culture, and management system topics including:

- The integration of management systems within an organization;
- Quality management;
- Leadership and organizational culture;
- The implementation of risk-based and informed approaches;
- Safety and security aspects; and
- Relevant standards.

CANDU Owners Group at the QLM Conference

COG will be there when international leaders and participants meet in Ottawa this summer.

COG President and CEO Fred Dermarkar will be participating in several events over the course of the conference. On July 16, he will participate in a session focused on Knowledge Transfer and Leadership, bringing together young professionals and experienced nuclear leaders. The panel will share ideas and personal stories related to leadership and knowledge transfer. On July 17, Dermarkar will co-host an invitation-only event for senior leaders in the Canadian Nuclear Industry and FORATOM. Then, on July 18, Dermarkar will chair a session on experiences and risks in supply chain regulation.

COG's Rachna Clavero, Director of Nuclear Safety and Environmental Affairs, will moderate a session with

industry leaders, who will share their vision for the industry's future.

Other COG speakers at the QLM conference include: Director Corporate Services **John Moore** speaking on CFSI; Joint Projects and Services Director **Sonia Qureshi** on COG's CANPAC audit program ; Program Manager **Macit Cobanoglu** will provide a look at supply chain metrics and Project Manager **Phil Smith** will moderate a panel on Management Systems.
