

COG: A 35-year historical timeline

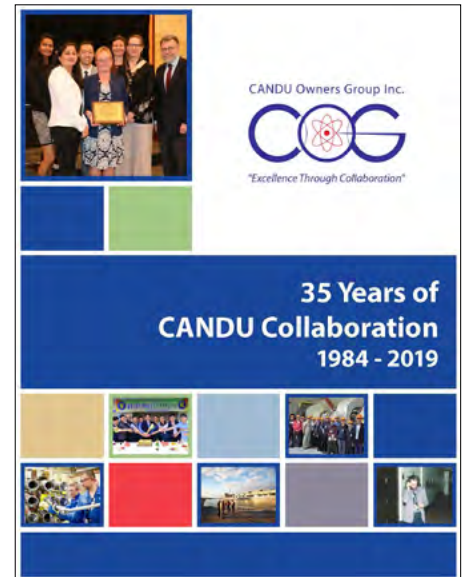

Highlighting COG's research projects and information exchange work through its history as well as industry achievements and world events

The CANDU Owners Group (COG) historical timeline captures events that have affected and built the nuclear industry through the years starting with COG's formation in 1984.

The timeline celebrates the people, research and milestones that have helped the Canadian and global CANDU industries to innovate, continuously improve and to provide safe, clean and reliable electricity to millions of people, worldwide.

The timeline highlights achievements and events this way:

- COG
- Canadian members
- International members
- Industry achievements
- Cultural milestones
